Product Position

THE NEXT GENERATION

What that means is:

- **Leading Quality**
 - Lowest Cost of Ownership
 - Easy to Use
 - Easy to Maintain
- **Unbeatable Service**
 - Fast Delivery
 - Flexible Product Offering
 - Easy Ordering
- **Technology Differentiation**
 - Modular components for flexibility & reliability

- **Seal life**
 - 2-3x the competition
- **NXT air motor**
 - 40 million cycle MTBF (4x the King)

SEAL

CYCLES				
	Graco Severe Duty	Graco MaxLife	SCA	Aro
Foot valve	80000	80000	12100	4300
Throat seal	40000	110000	*	*
Priming piston	25000	80000	*	5600

* Foot valves failed so frequently it wasn't possible to test other seals to failure
 - Test conducted with Sherwin Williams A100 paint (used for it's abrasive attributes)

Performance

- **Fastest changeover in the industry**
- **Noise Level**
 - 87dB @ 100psi
 - Closest competition is 90dB
- **Large range of pump and ram options to meet all viscosity, flow rate, and pressure demands**

Ease of Use & Serviceability

- Easy drum removal with one-button blow-off
- Integrated air controls locate all controls in one location
- All three NXT air motors share common wear components
- Throat seals can be serviced without removing pump from ram
- Wiper seals can be easily removed and replaced
- Pump, air motor, and platen can be serviced individually without removing other components

Upgrade options

- **DataTrak**

- Runaway control & pump diagnostics
- Material totalizers & maintenance counters
- Optional low/empty sensor & light tower

- **Electric Tandem**

- Everything included with DataTrak, plus . . .
- Automatic crossover, including due to runaway
- Optional depressurization/recirculation & filter pressure monitoring

- **MaxLife**

- For abrasive materials & long-life
- MaxLife coating on rods & cylinders
- Unique MaxLife seals
- Enclosed wetcup

Ease of Use Accessories

- **Drum Roller - 255627**

- Allows easy loading of 55g drums

- **Platen Cover - 255691**

- Protects top of platen from filling with material

- **Enclosed Wetcup Recirculation Kit - 255703**

- Provides recirculation of TSL between an enclosed wetcup(s) and a 5g pail

- **Fluid Purge Kit - 255690**

- Allows the pump to purge/prime into a 5g pail
